

VIMANA has shared its experience in the field of Blockchain usage with Blockchain professionals at the Planet Blockchain MeetUp in Dubai

November 4, 2017 – Dubai – Kirill Nikolaev, VIMANA Board member, took a part at Planet Blockchain MeetUp (<http://www.planetblockchain.io/home>) – the only one of its kind blockchain-community meetup in Dubai consolidated people interested in Blockchain and Cryptocurrency ecosystem.

Kirill Nikolaev with his speech “Vimana - Global blockchain standard for urban air mobility” presented VIMANA Autonomous Aerial Vehicle (<http://vimana.global/>) – a solution to the challenge of managing aerial vehicle travel in densely populated airspace in the form of a peer-to-peer, decentralized network for validating flight paths.

VIMANA raised a great deal of interest among Blockchain professionals, which were incredibly interested in the way how VIMANA is building its Airspace Management Platform with blockchain technology.

“Thanks to the organizers for the opportunity to speak about global blockchain standards for urban air mobility, development strategy and investment opportunities for the VIMANA project at Planet BlockChain. It was very important to present our project here, especially after fruitful negotiations with the Road Transport Authority’s representatives”, - says Kirill Nikolaev.

Others honorable speakers of this meetup titled “The System Behind Bitcoin” were Lars Rensing from ARK Ecosystem (<https://ark.io/>), Matej Pirtovsek from MoneyRebel (<https://moneyrebel.io/>), Rajesh Kumar Radhakrishnan from Telepixels Solutions (<http://www.tele-pixel.com/>), Feras Darweesh from Andiamo Yacht Charter.
